What Happened to Subaru's Old World - Re:Zero

Yes, that post is partially true and comes from a Q&A session with Re:Zero author Tappei Nagatsuki, where he provided non-canon but deeply emotional insights into what Subaru's life would have been like if he had not been isekai'd.

Author's Answer Summary (Paraphrased):

- If Subaru had not been summoned to the fantasy world:
- His father (Kenichi) would eventually step in and help him get out of his reclusive lifestyle (hikikomori).
- Subaru would gradually recover, likely get a job, and eventually get married.
- He would have lived a happy, fulfilling life in the real world.

- In the current isekai timeline:
- His parents never learn what happened to him.
- Some interpretations suggest they might think he ran away or even took his own life, and they blame themselves.
- These feelings of loss and guilt are not shown in the series, but the author acknowledged this as a likely emotional consequence.

Why It's So Sad:

It adds a tragic layer to the story: Subaru's disappearance wasn't just a fantasy adventure - it left emotional devastation behind for people who loved him. And the idea that he could have recovered and found happiness without being isekai'd makes his struggle even more bittersweet.

Important Notes:

- This was not part of the main story - it's from bonus Q&A content, so it's non-canon but from the author's own mouth.
- Fans often reference this Q&A because it shows that Re:Zero isn't just about action or fantasy - it's deeply grounded in regret, sacrifice, and emotional growth.
